

LVN Token Final Whitepaper Summary

Updated Token Overview

The LVN Token is a fixed-supply ERC-20 token on the Polygon network with a total supply of 8,008,135 LVN.

LVN tokenomics have now been finalized with the following allocations:

- Halving Smart Contract: 4,317,601 LVN (53.91%) locked over 28 years.
- Staking Pool: 1,000,000 LVN (12.49%) reserved for future staking rewards.
- Liquidity Pool: 1,000,000 LVN (12.49%) reserved for decentralized exchange pairing.
- Airdrop Smart Contract: 900,000 LVN (11.24%) for quarterly decaying distribution.
- Developer Wallet: 418,001 LVN (5.22%) for project and ecosystem development.
- Treasury Wallet: 272,533 LVN (3.40%) for strategic reserves.
- Airdrop Wallet (Unlocked): 100,000 LVN (1.25%) distributed pre-contract.

All smart contracts are non-mintable, non-upgradable, and immutable. Ownership is decentralized with transparent public wallet structure.
